

CONCORD SCREEN INC.

SCREEN CONFIGURATIONS

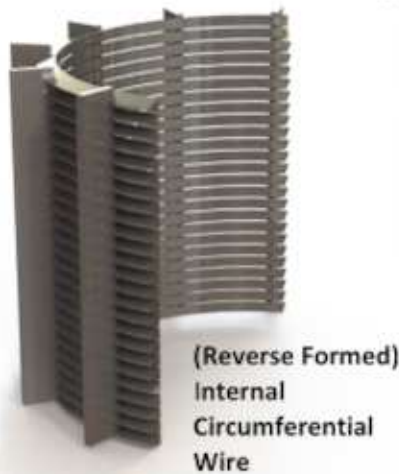

The possibilities in the variation and arrangement of Concord Screen's elements are nearly limitless. Whatever the shape, whether cylindrical, flat panel, conical basket or some other shape unique to your system, Concord Screen can be made to fit. We work primarily with stainless steel, but we also have vast experience with specialty alloys. We are continuously exploring and testing new materials that are proven useful for special applications.

Flexibility in fabrication makes Concord Screen perfect for retrofitting as well as for new installations. The illustrations below show some of the standard rod and wire configurations frequently used.

Outside to inside flow
